

**Joint Resolution between the
American Society for Radiation Oncology (ASTRO) and the Sociedades
Latino-Americanas de Radioterapia (SOLAR)**

This Joint Resolution is made by and between the American Society for Radiation Oncology (ASTRO) and the Sociedades Latino-Americanas de Radioterapia (SOLAR).

WHEREAS, ASTRO and SOLAR recognize the value of strengthening collaboration to advance research, education, and clinical practice in radiation oncology through meaningful global engagement; and

WHEREAS, persistent global disparities in access to radiation oncology education, professional development, and resources underscore the importance of strategic international partnerships;

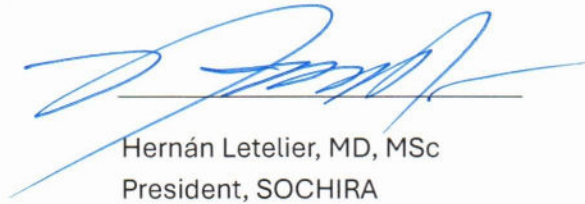

NOW THEREFORE, ASTRO and SOLAR express their shared intent to explore opportunities for collaboration, which may include, but are not limited to, the following areas:

1. Professional Engagement and Community Building: Fostering international professional connections and mentorship opportunities through shared communities, expert engagement, and collaborative forums that support career development across regions.
2. Education and Knowledge Exchange: Supporting the shared commitment to advancing scientific innovation, clinical best practices, and professional education worldwide through the exchange of educational resources and collaborative learning opportunities.
3. Equity and Economic Considerations: Recognizing the importance of economic context in global participation and exploring mechanisms to reduce barriers to engagement, including discounted membership and educational pricing based on World Bank country classifications, as well as free membership opportunities for Members-in-Training and Students, where appropriate.
4. Nature of the Resolution: This Joint Resolution reflects a shared vision and intent to collaborate and does not create legal, financial, or operational obligations. Specific initiatives or activities may be further defined through future discussions or separate agreements, as appropriate.
